## Marble Finishes

### The natural view

Alucomex® Marble is our Aluminum Composite Material with finished Kynar PVDF, this has a 20-year warranty.

Use this material to stylishly and renovate your spaces or projects that require the same appearance of marble, but with less weight; decorate walls and facades indoors and out.

Choose and adapt our select colors to any surface easily, quickly and with all the advantages of our brand for your project, such as resistance to flame, weather and UV rays; in addition, it is a versatil material, lightweight, easy to install and maintain that won't fade or dull, standing out for its quality superior to the competition.

### Features

| Finishes           | Size (In)       | (Ft)   |
|--------------------|-----------------|--------|
| PVDF               | 48"x120"        | 4 x 10 |
| Aluminum Thickness | Total Thickness |        |
| 0.35 mm            | 4 mm            |        |
