BRING YOUR PROJECTS TO LIFE

The solution that looks natural

Finished in PVDF Kynar, Alucomex® Wood is a lightweight material that is easy to install and maintenance, it is also durable, resistant and it has a 20-year warranty. Choose between any of our elegant shades, available with or without texture.

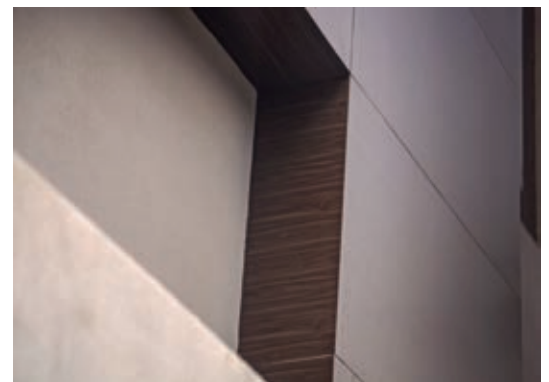

Our Aluminum Composite Material can be mold and apply to any surface; it can be used to improve your indoor or outdoor facades decoration, ceilings, giving as a result finish that will not go out of style and better outdoor resistance than real wood.

For Alutec®, it is important to take care about the environment that's why this material helps to replace natural wood and can also be recycle.
